train validation test ⓘ train-safe = blocked split with gap ≥ window, checked when saved

Why two sets are not train-safe

ws_human_labelled_mixed – supplied Review windows, overlapping, no split: fine for Review and interrogation, leaks if trained on (B7).

ws_M2aug_1ch_60s – gap 30 s is shorter than the 60 s window, so neighbouring windows share samples across the split.

train-safe

made by cnn_windows_v3 · sliding windows

recipe hash 5c1e...a07b

windows 15,660 over 3 channels

split plan · blocked by time

CH2_A1

CH4_A2

CH7_B2

grey = gap ≥ 600 s · 18 straddling windows dropped

- gap ≥ window on every boundary
- no test window within 600 s of training
- test windows unseen by any job
