Vocabulary

project · recorded with runs

Reset page to defaults

One vocabulary across annotations and adjudications – no translation table, so none can drift.

Verdicts keys, roles, counts in both stores

core five · rename or rekey, never remove

verdict	key	colour	role	in annotations	in adjudications	
seed	S		exemplar · promotes to Library	412	96	rename rekey
interesting	I		accept	1,284	2,140	rename rekey
not_interesting	N		reject	3,901	5,772	rename rekey
artifact	A		flag · kept out of training	211	318	rename rekey
unsure	U		defer	88	144	rename rekey

rename interesting → noteworthy

rewrites 3,424 rows across both stores atomically · existing exports keep the old name

+ Add a verdict · needs a role

Classes optional class keys in Review · classes for multi-class models

+ Add class

key	class	colour	informative	implies	labels	used by models	
1	spike-train		informative	interesting	410	cnn_cluster_v1	rename
2	burst		informative	interesting	380	cnn_cluster_v1	rename
3	slow-drift		informative	interesting	330	cnn_cluster_v1	rename
4	plateau		informative	interesting	250	cnn_cluster_v1	rename
9	electrode artifact		non-informative	artifact	38	–	rename

an informative class implies interesting; a non-informative class names the verdict it implies · renaming a class rewrites its labels, models keep their own snapshot

Morphology tags many-to-many on library entries, never a primary key

+ Add tag

tag	definition	example	families	members	aliases	
spike-train	regular train of sharp drops, 3 or more events		3	412	spike-train-short (merged)	rename merge
biphasic	rise then fall of similar depth within about 2 s		3	210	–	rename merge
sharkfin	single steep fall then slower recovery, within about 30 s		2	112	–	rename merge
slow-drift	baseline movement over more than 10 min, no events		4	188	–	rename merge
burst	3 or more fast oscillations within 5 s		2	77	–	rename merge
plateau	sustained level shift, then return		1	26	–	rename merge

1 unsaved change rename interesting → noteworthy rewrites 3,424 rows in both stores
