differs from default

Review queues

project · recorded with runs

Reset page to defaults

Defaults for new queues. The blind state is stored with every verdict.

Queue defaults by source

source	blind	verdict keys	cap	order	writes
Discovery run	visible	full · S I N A U	–	score, high first	adjudications
Seed search	visible	full · S I N A U	–	distance, near first	adjudications
Explore spans	visible	full · S I N A U	–	time	annotations
Library family	visible	full · S I N A U	–	distance to medoid	adjudications
Training windows	blind	binary + classes	20,000	stratified by channel	window verdicts
Model verification	blind	full + classes	40	stratified by class	window verdicts

blind hides score, family affinity and model calls until the verdict · artifact likelihood is never hidden

Clusters batch verdicts in Review

cohesion limit

0.45

a member farther than this from the medoid is excluded from the batch by default

a sequence is shared with Library sequences

same run and channel, gap ≤ 6 min at least 2 events

largest batch

50 members

undo reverses the whole batch

Promotion the seed verdict

S promotes to the Library

a separate promote step would duplicate the seed key

suggest the nearest family when d ≤

0.30

otherwise the panel suggests no family yet
